POULTRY—Hens, \$2.50\(\omega\$2.0c\); springs, \$2.00\(\omega\$2.0c\); furly per coloration of the visible was looked for Monday and New York reported moderate selling at the opening for foreign account. Not withstanding all this the market became strong almost immediately. Moderate buying by local long interests principally, supplemented by a little covering by \$1\(\omega\$2.5\(\omega\$2.5\

tamine from parts of Southeastern Russia and California reported a centinustion of the drouth.

A factor in the advance was the report that the reduction of the Italian grain duty would probably remain in effect until the last of May. After the advance to 1854/1878, the price cased off slowly to Sty on realizing, but closing Paris cables caused another brief period of strength and a reaction to 285/1878-19. Paris was firm at 10/18 centines for flour and 10/18 centines higher for wheat, At the closing hour prices gradually recovered. There were moderate, though persistent offerings, principally in the way of local evening up transactions, and May finally dropped to 95. That price was bid at the close.

The market for corn was firm but dull, with prices averaging a little over yesterday's close. The market was a good deal influenced by the action of oats. Wheat scalpers were moderate buyers. The slight advance disappeared under realizing late in the session, the market closing steady.

Oats were again quite active and the market made a new high mark for the season. Reports of large cable acceptances were an important factor in the advance. There was beavy buying by the most influential traders and shippers and commission houses took quantities. The advance brought out liberal realizing and part of the advance was lost, the market closing firm.

Provisions were again quite active. Prices reached the highest points of the season, but heavy realizing at the top caused a reaction, the market closing steady, but with all the advance lost.

Estimated roceipts Monday—Wheat, 70 cars; cort, 610 cars; eats. 250 cars, and hogs, 18,000

GALVESTON STOCK.

IN THE COTTON MARKETS.

Bulls Had an Inning and Created a Good Advance.

ALL SPECULATIVE MARKETS HIGHER.

New Orleans Seven to Elight and New York Seven Points Up-Liverpool Higher-Spots Firmer.

Office of The Post. Houston, Saturday, February 5. trading in the speculative markets. The advance is refreshing and came in

the face of a heavy movement and reports of a falling off in Indian demand. Transactions were the largest for the week, being 122,700 in New York and 20,-600 in New Orleans. Spot sales in Liverpool were good for a half day, being 8000

It is claimed by the bears that the market is being manipulated, but this matters little so long as prices advance.

Liverpool futures showed from 1 to 114-61 advance at the close and New York 7 points. New Orleans, which has been bearish of late, advanced 7 to 8 points. In New York, for the first time for some weeks, a figure 8 appeared on the distant deliveries, Houston, New Orleans and Savannah adspeed spots 1-16 and other spot markets losed steady and firm at unchanged prices Port receipts were \$7,277, against 14,243

last year and 22,797 in 1895. New Orleans expects Monday 13,000 to 15,000, against 9094 last year and 16,111 in

Houston expects 5000 to 5200, against 2637 last year and 4724 in 1895.

Hunter's Weekly Cotton Letter. Today's market has furnished the only cession of interest during the week in cotton. Liverpool was firm at an advance of 14 points and did a good spot business. The improvement was stiributed to the splendid spot demand and to continental uying on a large scale. At the same time the plague was reported as assuming a very serious aspect, but this, as well as all other news of a bearish character, was ignored. It was bull day and that side had full swing, advancing prices at one time full 9 points above yesteriay's close, but easing off 1 or 2 points at the close. Liverpool is due to come i is higher Monday to be up to our close, and it is thought that she will not disappoint the bulls. Heavy covering was done by big bears, and there was some selling out of long cotion which showed a profit, or was nearer even than it had been for some time. New York sold 3 points above the recent high point for May and 21 points up from the lowest and 5 points above the recent high point. While the sharp advance in Liverpool, which fornished the incentive for ligher prices on this side, came as a surprise to a great many, and many traders thick it due to manipulation just for a little turn to run in some shorts who were getting tired waiting for the market to break, it remains a fact that there is still room for much improvement and higher prices are confidently expected.

An Animmted Market. very serious aspect, but this, as well as all

An Animated Market.

Cargill & Richardson of Houston say. After a season of extreme duliness cotton awoke today, the entire session showing more animation than any day in aix months.
